

## 码垛系统

### Automatic Palletizing Machine

该设备主要适用于各种高速包装生产线成品的码垛仓储，采用侧进箱方式，占地面积小，结构更先进，动作更轻便平稳，低能耗。

码垛的方式调整简单方便，可以在人机界面上实现，同时该系统适用于纸箱，膜包产品。

This machine is mainly used in various high-speed production line palletizing and storage. It uses side-entry box mode, which covers small area, has more advanced structure, more portable and stable movement, and low energy consumption.

The method of palletizing is simple and convenient to adjust. It can be realized in man-machine interface. At the same time, the system is suitable for both carton and film-wrapped products.
